BUILDING PHILOSOPHY

I build products by understanding markets before writing solutions. I begin with customer discovery, validate real problems, and design practical systems that create measurable value. I use AI throughout the product lifecycle—from research and prototyping to automation and software development—to execute rapidly. My strength lies at the intersection of customer understanding, business execution, and AI-assisted product development.

BUILDING EXPERIENCE

Founder | [Bizz Bazaar](#) (Hyperlocal Commerce)

Nov 2025 – May 2026

- **The Insight:** Personally visited 100+ retailers to understand why traditional merchants hesitate to adopt digital commerce.
- **The Build:** Built an AI-assisted WhatsApp commerce platform with intelligent inventory management and workflow automation, reducing product listing effort by ~70%.
- **The Grind:** Onboarded 25+ merchants through field research, customer conversations, and relationship building.
- **The Impact:** Digitized 5,000+ products while continuously improving the platform based on merchant feedback.

Founder | [Track100x](#) (Creator SaaS)

Jul 2025 – Nov 2025

- **The Problem:** Independent creators lose significant time managing payments, attendance, and scheduling.
- **The Build:** Built an AI-assisted management platform that unified scheduling, payments, attendance, and student management.
- **The Impact:** Delivered an MVP within weeks by combining customer insights with rapid execution.

Co-Founder | [Invasalink](#)

2024 – 2025

- **The Strategy:** Validated demand for rapid print-on-demand fulfillment through direct outreach.
- **The Hustle:** Personally cold-called 200+ businesses to understand logistics challenges and customer expectations.
- **The Operations:** Worked across supplier coordination, logistics, and business development.

CORE CAPABILITIES

Business & Growth: Customer Discovery • Business Development • Market Research • Merchant Acquisition • B2B Sales • GTM Strategy

AI & Product Development: AI-assisted Software Development • Workflow Automation • LLM Integration • Computer Vision • Prompt Engineering

Technology: React • Node.js • JavaScript • MongoDB • Supabase • REST APIs

EDUCATION

Indian Institute of Technology Madras

BS in Data Science & Applications (Pursuing)

Sri Sathya Sai Institute of Higher Learning

Diploma in Business Administration
